Undersettled Claims and Failed Claims - No Win No Fee ^[1]

- Have you had a failed personal injury claim?
- Have you settled your claim and still have injury symptoms?
- Did you not receive your financial losses such as loss of earnings?

If your answer to any of these questions is yes, or you feel that your claim was not dealt with properly, contact us now on a **NO WIN NO FEE** basis.

We will review your claim and advise you if it was not dealt with correctly. If this is the case we will pursue the solicitors who dealt with your claim to get you the compensation that you should have received.

Sydney Mitchell have over 250 years experience and have specialist lawyers who deal with undersettled or failed personal injury and clinical negligence claims. As long as your claim finished within the last 6 years we can help you.

The use of under qualified staff with inadequate supervision often leads to claims being undersettled. Pressure is often exerted to settle claims prematurely before the true extent of the injuries are known. Lack of knowledge of the law leads to failed claims. If this has happened to you, contact us now.

Take our survey to see if you should have your claim reviewed:

1. Was your solicitor appointed by someone else?
2. Was the poor contact from your lawyer?
3. Did you need help from family and friends but no claim made for their time?
4. Are your chances of getting a job / new job in the future reduced and not compensated for?
5. Was liability denied and claim dropped?
6. Was your claim settled whilst symptoms on-going?
7. Did you feel forced to settle?
8. Were financial losses/expenses not claimed or recovered?
9. No full statement taken from you?
10. Was a deduction made from your damages by solicitor or claims management company?
11. Did you never meet your lawyer face to face?

If you have answered 'yes' to any of the above, then contact us now on 0808 166 8798.
